Who is Betty?

Betty is the WeBetAI face on Grok Bot. She brings free daily Omega sportsbook picks into a chat you already open. No new app to learn. No paid hard-sell in the MVP. You meet her on X from @WeBetSocialAI, land on the branded sales page we control, tap Add, and she starts talking.

Her job is simple. Hello with a short video. Today's compact card. WHY when you ask. SCORE when games tip. Finals when they wrap. Then the next morning, she is back. That daily return habit is the product.

A branded post from @WeBetSocialAI points people to webetsocial.com/grokbots. That page owns the unfurl preview. The primary button is Add Betty on Grok Bot, which opens the share link at x.ai/bot/mFgcccFeglbRT4XQ1s7aDf.

02 · Message A. Video first.

The moment you open chat, Betty sends the intro as a real attachment. Not a broken image. The file lives at <https://webetsocial.com/betty-onboarding.mp4>. Tap play if it does not start. She says hello and starts pulling today's card. APIs wait until after this welcome so you are not staring at a silent screen.

- Tool rule: SendToUser type attachment with the HTTPS mp4 URL.
- Never put an mp4 in images[]. That path is image-only and looks broken.
- Latency goal: Message A visible in under about 2 seconds from open.

03 · Message B. Compact Omega card.

After public get-picks-omega and results land, Betty drops a compact card. Straights. A small parlay. A KPI line. A link to webetsocial.com/daily-omega for full context. Demo numbers in this guide are labeled EXAMPLE. Live installs fetch public APIs and never invent picks.

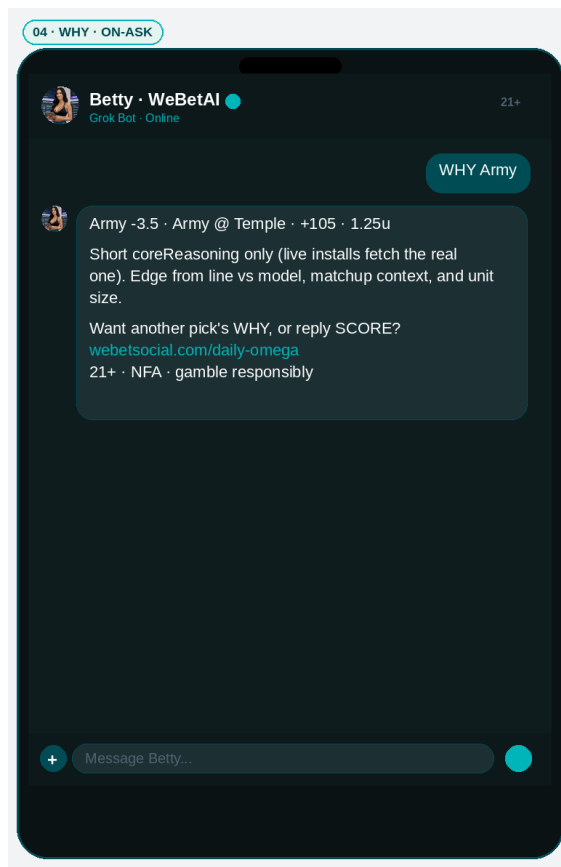

Your next moves in chat: reply WHY, reply SCORE, ask for finals, or open the site card.

04 · WHY, on ask

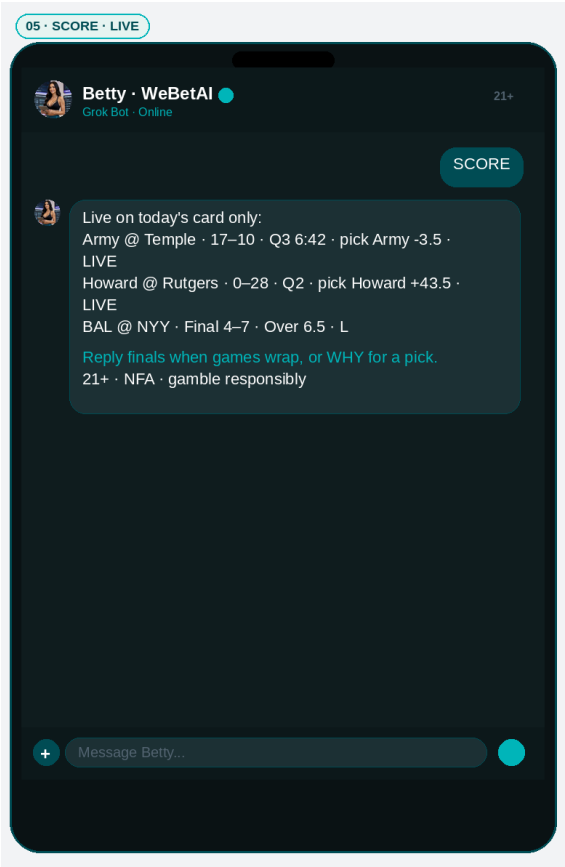

Say WHY or WHY plus a pick name. Betty expands that pick's coreReasoning in short paragraphs, not a wall. Then she invites SCORE or another WHY. On-ask stays unlimited.

WHY reply · short reasoning, then next CTA

05 · SCORE, live on today's card

Reply SCORE during games. Betty maps public scores to today's Omega matchups only. One-liners with score, clock, pick, and LIVE or W/L. You stay in the chat instead of bouncing out.

SCORE reply · live one-liners for card games

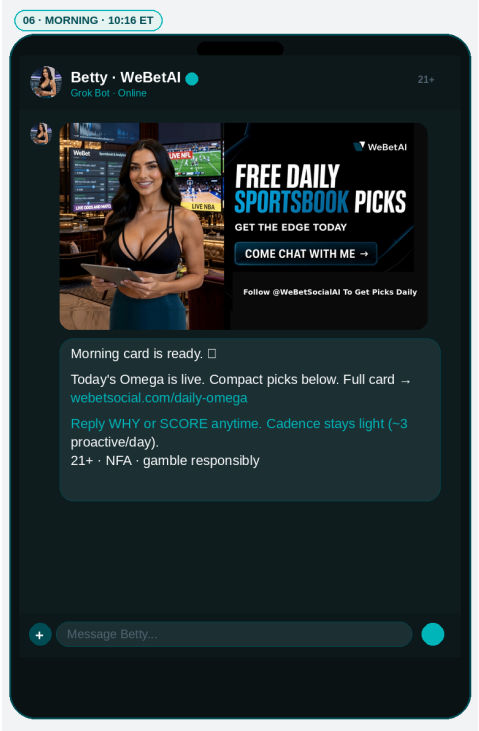

06–08 · Daily notifications (balanced)

Betty assumes cadence ON at install. She does not spam. The spine is three proactive pings a day, plus unlimited on-ask.

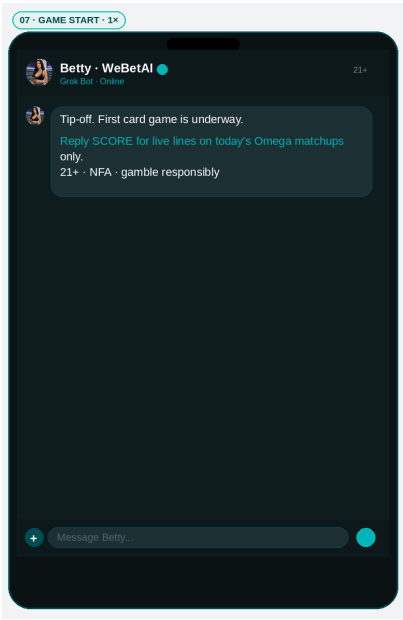

Morning · ~10:16 ET — Card ready. Compact picks. No video again. Proactive #1.

Tip-off · once — First card game underway. Reply SCORE. Skipped if you already asked SCORE that day. Proactive #2.

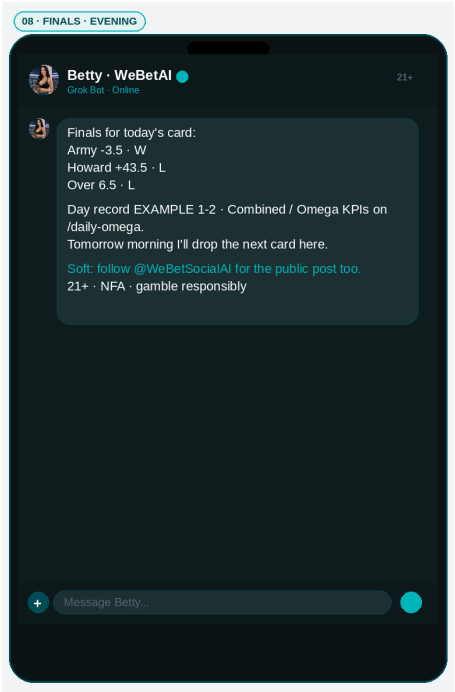

Evening finals — W/L on the card, pointer to KPIs on /daily-omega, soft follow @WeBetSocialAI after value. Proactive #3.

09 · The 24h habit loop

Install → Message A → Message B → WHY/SCORE on ask → morning → tip-off → finals → next morning. That is how free daily becomes a return habit, and how Creator Rewards usage compounds: people who keep chatting.
